WHY AND WHAT IS TRANSFORMATIONS 2019?

CONFERENCE
TRANSFORMATIONS
LEARNING FROM
TRANSFORMATIVE
ACTION AND THINKING **2019**

The Paris Climate agreement and the Sustainable Development Goals have raised human ambitions to achieve radical transformations to address global social and environmental challenges.

Transformations 2019
“Learning from transformative action and thinking”

WHY AND WHAT IS TRANSFORMATIONS 2019?

CONFERENCE
TRANSFORMATIONS
LEARNING FROM
TRANSFORMATIVE
ACTION AND THINKING **2019**

- The planet is experiencing rapid global changes.
- In a single generation, humans have grown into an enormous global force, we have built the planet past and present.
- We cannot be the drivers of inaction, but a hope and motivation for writing the planet's future.
- Science has contributed and focused on the development of incremental and systemic responses.
- There is an opportunity to further explore the transformation approach, aiming for greater scales and deeper changes.

AIM

To provide a platform for reciprocal learning between less and more developed contexts, and between researchers and practitioners, in order to enhance both practice and theory to support transformative changes for addressing climate change and other contemporary societal and environmental challenges.

2019

Overarching theme “**Learning from transformative action and thinking**”

- Science has made great advances in the field of transformation but in many cases, practical and scientific knowledge are evolving independently.
- Unexplored knowledge captured in society that can inform science, and science can inform practice.
- Practitioners, social actors, case studies, and local contexts will have a central role.
